# HD-IP CCTV SYSTEMS

Round the clock security with High Definition IP CCTV

Want to use your old analogue cameras as part of your new HD-IP system?

## The Video Server X100VS

The X100VS Video Server will quickly and easily convert old analogue cameras to IP allowing you to view your cameras over the internet or to use them as part of an Xvision IP CCTV system.

Please note the image quality of your analogue CCTV camera will remain the same, the Video Server simply converts the signal from analogue to IP.

Works with analogue devices with a video or audio output. Even works with Speed Domes, adding full web based remote control of pan, tilt & zoom. Includes Multi Camera Viewing & Recording software for up to 64 IP Cameras.

### Compatible 3G Mobile Phones

Check [www.ipcctv.com](http://www.ipcctv.com) for the latest list or try our demo camera online from your Mobile Phone, see website for details.

### Specifications for Viewing over for a Web Browser

**Display:** 1024 x 768 +; DirectX 9.0c + Intel 945G/965G or above

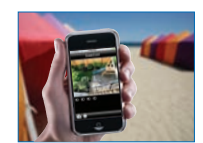

**OS:** Windows XP/Vista/7  
**Hard Drive:** Minimum 60GB recommended  
**Ethernet:** 100 MBps  
**Chipset:** Intel 945/965 or above

Easy to set up & use in your home or business premises

Powerful 64 Camera Viewing & Recording Software supplied

Watch your cameras from anywhere in the world using your mobile phone

High Definition images for **3x** the resolution of standard IP CCTV cameras

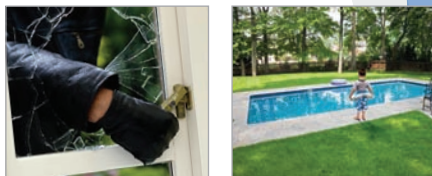

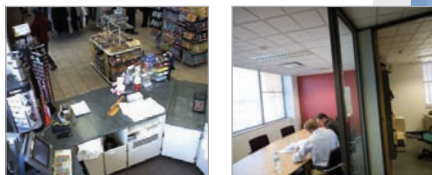

## HD Viewing & Recording for every application

The X100 range from Xvision is a unique range of IP cameras offering High Definition Megapixel image quality - 3x the resolution of standard IP and CCTV cameras.

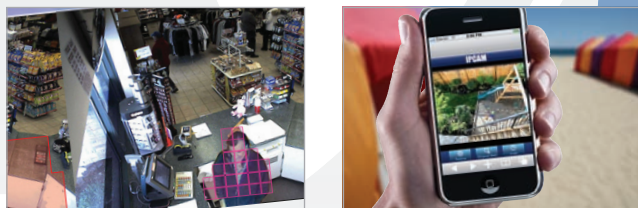

The X100 range can be used for a host of applications around any home or business premises.

For total peace of mind, safeguard your home or watch over your loved ones whilst you are out or in another room.

Protect your Office or Business premises around the clock, and even check up on your cameras from your PC or compatible 3G Mobile Phone while out to dinner or from the other side of the world.

With a wide selection of cameras in the range, choosing the perfect system for your premises is easy!

See the table overleaf for details on selecting cameras.

## Features

 Easy 'Plug and Play' installation

 High Definition 1.3 Megapixel images for the best resolution - 3x better than standard IP and CCTV cameras

 Triple compression technology including H264 for the highest quality image and lowest bandwidth - up to 4x better performance than MPEG4 based cameras

 View from any compatible 3G Mobile Phone

 Remote Viewing from anywhere in the world via a Windows PC or Apple Mac

 Some models are Wi-Fi compatible for simple wire free installation

 Digital Zoom for detailed viewing

 Smart Motion Detection - Records only when the camera sees motion

 Intruder Alert - Sends an email instantly when it sees motion

 Quality components for built in reliability

### Record your cameras 24/7 using your PC!

The X100 range is supplied with powerful Digital Video Recording software. This software allows you to view and record up to 64 cameras on a Windows PC.

Recordings are made in HD resolution, resulting in great high resolution evidential quality images.

The software is feature packed and easy to use.

## About HD CCTV

High Definition or No Definition..... It's your choice!

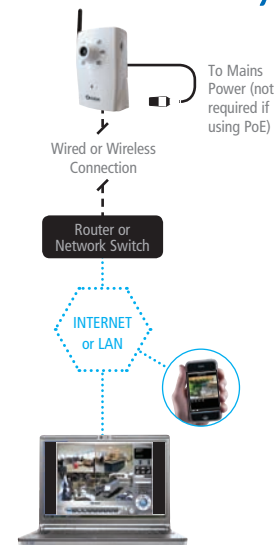

Using the latest Xvision HD Imaging Sensor, our cameras produce over 3x the resolution of Standard IP/CCTV cameras.

Standard

HD

## How it works

To Mains Power (not required if using PoE)

The camera turns video & audio into data & transmits this data digitally over a Network connection

Simply connect the camera to your Network Switch or straight to your Router - Just plug in & go!

View images live on the local network, or over the Internet - from a PC, Mac or Mobile Phone

Use the CCTV software supplied to View, Record & Playback up to 64 cameras
